

Everyone Wins When You Recycle

Every time you drop off some packaging or a newspaper for recycling, this is the start of something big.

The old bottle cap can be transformed into sheet metal for cars. The empty detergent box becomes a new pizza box. Yesterday's newspaper becomes tomorrow's. Nature's resources are used again and again, saving large amounts of energy. Small choices in everyday life make a big difference.

Sort More!

We need your help to make recycling easier and more accurate. Here's how to prepare your packaging before recycling it.

- Check the back – it often tells you how it should be sorted.
- Rinse with cold water if needed.
- Empty, flatten, and fold the packaging.
- Sort packaging made from different materials according to the material that weighs the most.

Food waste is placed in the bag provided specifically for it.

YES

Daily newspapers, magazines, catalogues, leaflets, brochures, printer paper, drawing paper, paperbacks.

NO

Paper bags, cartons, gift wrap, plastic-coated paper, envelopes, Post-it notes, hardcover books.

NO

Materials larger than 75 cm, chemicals, white goods, car tires, hazardous waste.

Thank You for Sorting Your Waste!

Together, we can make a difference and keep the recycling room tidy. It's good for both the environment and your wallet.

Sort household waste as food waste or residual waste

YES

Bread, pasta, rice, vegetables, fruit, meat, fish, shellfish, eggshells, tea leaves, tea bags, coffee grounds, coffee filters, uncolored paper towels.

NO

Dust, wine corks, soil, flowers, cat litter, pet litter, diapers, pads, cigarettes, ash.

YES

Diapers, plaster, tops, wet wipes, napkins, envelopes, Post-it notes, dust, cat litter, pet litter, cigarettes, ash.

NO

Hazardous waste, medicines, packaging, batteries, small electronics, light sources, fluorescent tubes, food waste.

Take this waste to the environmental station, recycling center, pharmacy, or secondhand shops

Hazardous waste such as paint, nail polish, chemicals, solvents, gas tubes, gas cartridges and spray cans with contents must always be left at the environmental station or recycling center.

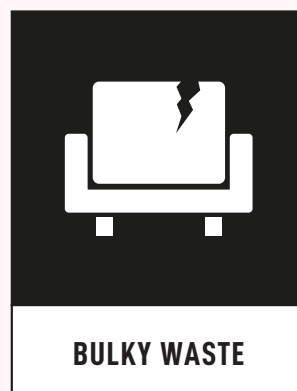

Pharmaceuticals are taken to the pharmacy. You can sort empty pharmaceutical packaging as usual based on type of material.

Small amounts of cooking oil are wiped off with paper towels and placed in the food waste.

Larger quantities are collected in a plastic bottle, milk carton or similar container and taken to the environmental station, recycling center, or placed in residual waste.

Large and heavy items that do not fit in the containers in the recycling room must be left at the recycling center.

Please try to reconsider whether it can be donated or reused instead.

Leave whole and clean items that work in the neighborhood exchange room/corner if there is one. Or take to secondhand shops and charitable organizations.

Worn-out textiles are taken to an environmental station or recycling center.

Return cans and plastic bottles in the reverse vending machine at the grocery store.

You can also donate your deposit money to charity!
